

JOB DESCRIPTION AND REQUIREMENTS

for

SENIOR Life Cycle Assessment Analyst - Remote

Company Summary:

Climate Earth Inc. (www.climateearth.com) is a fast growing and innovative provider of cloud-based applications that automate life cycle assessment and the creation of all digital environmental product declarations (EPDs) for the concrete industry. After water, concrete is the most widely used material in the world. It is fundamental to shaping our world, but it contributes 8% of global warming. Reducing the carbon footprint of concrete is a critical worldwide need and Climate Earth products instantly measure the carbon impact of thousands of concrete mix designs, helping our customers continuously innovate and produce lower carbon concrete.

In 2023, we are strengthening our leadership in North America and continue to expand globally into both Europe and Asia. The company's software tools remain the first and only suite of applications designed to instantly measure concrete's carbon impact. Our applications are being used by more than 800 sites across North America, Europe and Asia.

The company has supported a remote work environment since our founding and has developed and maintained a strong team culture.

Position Title: Senior Life Cycle Assessment Analyst
Location: Flexible but prefer Eastern US or European time zone
Reports to: Vice President of EPD Services

Position Summary:

Climate Earth is seeking a technically strong Life Cycle Assessment Analyst to join our diverse inclusive team of LCA and software professionals. The Senior Life Cycle Assessment Analyst is responsible for both implementing clients onto our software platform and for collecting and synthesizing information to produce complex life cycle assessment (LCA) models and reports of new innovative materials and processes. The Senior LCA/EPD Project Manager will be responsible for providing clients with high quality results within project schedules and budgets.

Working closely with the Vice President of EPD Services, you will be responsible for selected major account relationships and will manage some of our most complex LCA projects. Day to day you will be managing multiple LCA projects and EPD Generator implementations while simultaneously maintaining critical business relationships. Using strong relationship and consulting skills the Senior LCA/EPD Project Manager will build and preserve our trusted customer relationships and identify opportunities to better serve customers with additional or new applications.

This position requires strong customer relationship and project management skills and is also a hands-on technical position, requiring a critical eye for detail and a big picture perspective. The successful candidate must be a team player, skilled time manager and negotiator, obsessive planner, strategic thinker, and skilled writer who is self-motivated, creative, confident, hardworking, and enthusiastic.

The starting salary range for this position is \$80-\$100,000, depending on type and years of experience.

Qualifications:

- A minimum of 5 years of corporate LCA experience, preferably with building materials
- Familiarity with global LCI databases and demonstrated ability to research and build life cycle inventories
- Experience conducting 3rd party LCA/EPD reviews and working with a variety of program operators
- Experience working directly with clients and supporting business development
- Experience organizing and leading small teams in a collaborative environment
- Highly motivated and detail oriented with the ability to work independently and in close collaboration with team members
- Master's degree in environmental science, engineering or a field related to life cycle assessment
- Demonstrated expertise in all relevant LCA standards to include ISO 14040, 14044, 14025, 21930, EN 15804 and multiple construction PCRs
- Proven ability to build complex LCA models in the latest versions of SimaPro and/or GABi software
- Skilled written and verbal communicator, including ability to present complex information to a non-technical audience
- Excellent interpersonal and communication skills
- A team player with strong leadership and customer relationship skills
- Fluent in English plus one or more languages
- Ability to travel
- US Visa

Location and environment:

- While location is flexible, we prefer candidates located within the US Eastern or European time zone

Health and Retirement Benefits:

Climate Earth offers both retirement and healthcare benefits for US based employees.

We offer a 401K Retirement Plan and a Health Reimbursement Arrangement (HRA): The HRA provides tax-free reimbursement of qualified medical expenses including insurance premiums, co-pays, deductibles, eye care, dental care, or any other qualified healthcare expense.

To apply:

Submit your resume and cover letter to recruiting@climateearth.com.

Applications will be reviewed on a rolling basis until the position is filled.

Note that we do not accept phone calls, drop-ins, or hard copies.
