

EPD Advantage Pro™

The First EPD Information Management System (IMS)

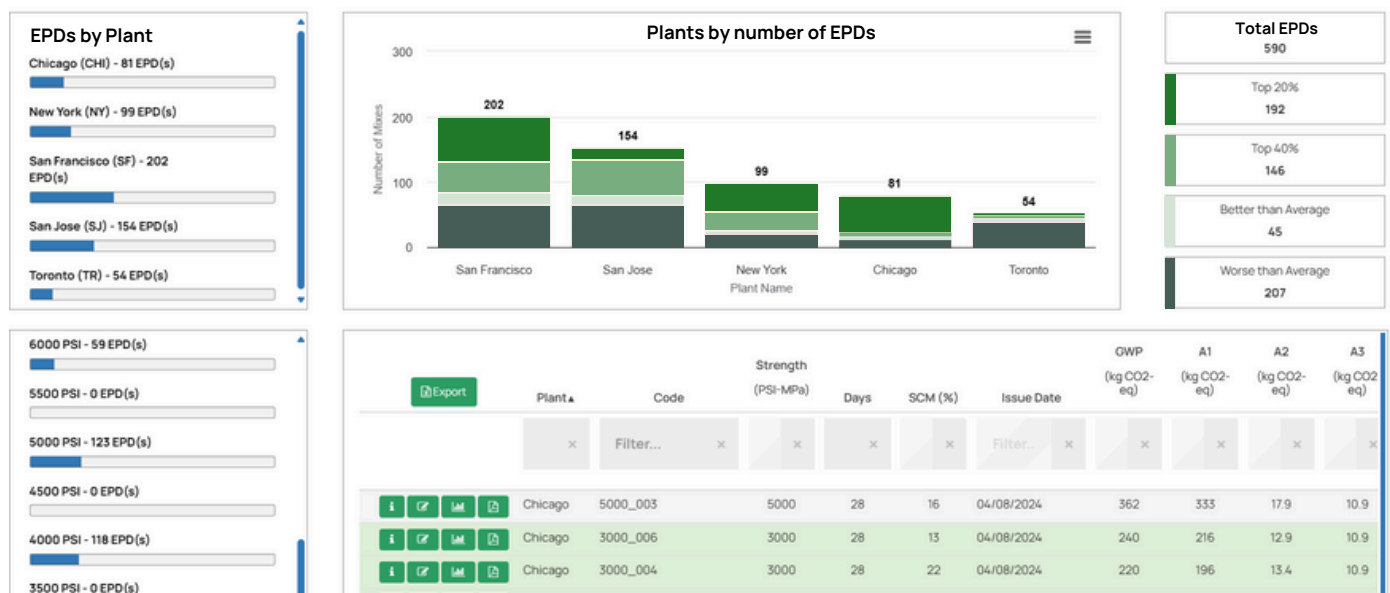

EPD Generation Game-Changer

Leveraging Climate Earth's 16+ years of EPD Generation expertise, our interactive dashboard empowers concrete & cement producers to analyze carbon performance and reach sustainability objectives while ensuring superior product quality.

“EPD Advantage Pro is a game changer, enabling concrete producers to easily respond to bids by evaluating materials, suppliers, & means of transport to bring low concrete options into the market.”

– Chris Erickson, Climate Earth President & CEO

What We Offer

Key Benefits

360 Degree View of Environmental Performance

Achieve a strategic advantage by gaining thorough insights into your company's carbon performance across all of your plants. Quickly identifying mix requirements to speed up decision-making, and enable comparative mix design analysis to unlock silos and share best practices.

Supply Chain Optimization

Gain insight into supply chain impacts from raw materials to end products, identifying vulnerable points and diversifying suppliers to minimize material and transport impacts.

Carbon Reduction Strategies

Pinpoint carbon hotspots in plants and mixes, and accelerate the innovation of low-carbon concrete products.

Trust-Building Carbon Reports

Use reporting to win bids and increase credibility by demonstrating your commitment to sustainability.

Seamless Workflow Integration

Easily integrate with existing workflows and IT systems via custom APIs.
